

People Are Talking About Silver Shield™

"I had my attic installed with Silver Shield last week. Huge difference! Excellent product, instant results! I would recommend to anyone."

- Michael Ervin • Portsmouth, RI

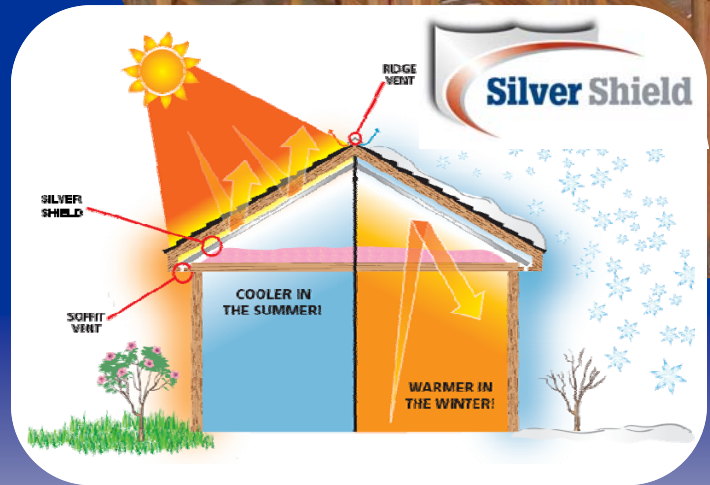

"I noticed that the attic is so much cooler than our last house and the inside of our home and the garage are more comfortable too. The product is spectacular. I am really happy the we had Silver Shield installed in our home."

- Rey Holtz • Miami, FL

Silver Shield

Improve The Energy Efficiency & Comfort Of Your Home

Fi-Foil's Silver Shield™ is a high performance insulation product that saves energy and improves comfort in buildings. Silver Shield™ has multiple layers of aluminum which separate when installed to form an enclosed airspace. These layers reflect and reduce the emittance of radiant energy by 97%. This unique multi-layer design reduces heat gain in the summer and heat loss in the winter. Typical applications include roof rafters and walls. Insist on the best energy saving technology to boost the performance of your building's insulation system to control temperatures and improve comfort throughout your home or business.

*Silver Shield is also a great addition
to walls facing an attic space*

Features & Benefits:

- ◆ Unique design of high performance materials combined into an advanced multi-layered insulation
- ◆ Reduces utility bills, saves energy, improves comfort
- ◆ Reduces attic temperatures up to 30 degrees in summer
